“ CAS CIRER ”

....

Amidst Ibiza's hilly landscapes, Cas Cirer rises from the ground, from the existing stone wall feixas, to embrace three soft volumes that grows and expand to the horizon and sea views.

We would like to infuse a warm, authentic soul into this space by seamlessly blending the indoors with the outdoors, utilizing natural materials, warm colors, and the natural hues of wood. This journey at Cas Cirer involves softening harsh edges, embracing the natural world, and cultivating an atmosphere of genuine warmth and comfort.

Our goal, to respect traditional Ibicenco architecture and materials with a contemporary touch in details. Together, they symbolize tribute to the embracing hills and surrounding nature, as a retreat where nature and serenity blend seamlessly.

Emphasizing our goal of making this place feel like a welcoming and intimate home. Here, the combination of elements fosters a warm and inviting atmosphere, promoting a sense of belonging.
